**me:** howdy

**baronsyntax:** hey

**me:** what's the latest?

**me:** make it to work?

**baronsyntax:** yeah, it seems to be running just fine now :-)

**me:** sweet

**me:** mind a programming queastion?

**baronsyntax:** No queastions please. but you can ask me a question if you'd likfe ;-)

**baronsyntax:** I am the grammar facists

**me:** i can tell :)

**me:** ok,

**me:** log() is included in Math::Trig in perl, but my admin won't include the module. is there a way to access the contents of the module so I can copy log() and write it out in my own script?

**baronsyntax:** I think you might be able to copy the .pm file to the local directory

**baronsyntax:** I might have to go to a book to answer this question

**me:** all i mean is, isn't a module just a bunch of subroutines. couldn't I copy the log() sub line for line out of the module into my script?

**baronsyntax:** yeah, you could

**me:** is there a place online to view the modules?

**baronsyntax:** CPAN

**me:** ahh, right. you already showed me that

**me:** thanks, I'll check it out

**baronsyntax:** <http://cpansearch.perl.org/src/JHI/Math-Complex-1.56/lib/Math/Trig.pm>

**me:** beat me to it!

**me:** aww crap, it references other modules

**me:** this could get complex

**baronsyntax:** yeah, that's the problem

**baronsyntax:** I think you can just copy all the .pm files to the local directory

**me:** I don't even have a local directory. I just upload my snippet through their website

**baronsyntax:** ew

**baronsyntax:** whoTF is your admin?

**me:** theartofbooks.com

**me:** i don't think they've come accross someone as ambitious as me trying to write a repricing script

**GOVERNMENT  
EXHIBIT  
1000  
14 Cr. 68 (KBF)**

**baronsyntax:** So there's no way for you to do a multi-file program

**me:** I don't think so

**baronsyntax:** Is there a size limit?

**me:** not that I've encountered

**baronsyntax:** maybe you could just edit all the files together

**baronsyntax:** and remove anything you don't need

**me:** yea, I can give it a shot.

**me:** thanks

**me:** halloween plans?

**baronsyntax:** best o luck

**baronsyntax:** I dunno

**baronsyntax:** some people want me to go up to Denton but that's a long drive and I just don't know if I'm up for it again

**me:** yea, kinda far. not sure yet what I'll be doing either, but if you want to dress up on sat, give me a call. I'll probably be going out

**baronsyntax:** ok, I was thinking of reusing my costume from last year

**baronsyntax:** it's a new town so I think I'm allowed to do that

**me:** oh yea, for sure

**baronsyntax:** maybe dude

**baronsyntax:** Do you know who Alejandro Jodorowsky is?

**me:** nope

**baronsyntax:** ok, I just wanted anecdotal evidence that he is somewhat obscure

**baronsyntax:** remind me to tell you about his movies sometime
