baronsyntax: I'm just now reading about the tor network

me: yea, site's down again

me: what are you reading?

baronsyntax: just the wikipedia page

baronsyntax: apparently tor does a lot of encryption/decryption

baronsyntax: could be an expensive operation

me: im so stressed! I gotta get this site up tonight

me: it's so weird because the site is accessible through tor2web, but not by directly accessing the .onion url

baronsyntax: I'm not sure how that stuff works

me: i wish i did

baronsyntax: I was reading about a group that's trying to enable the tor protocol in routers

baronsyntax: and have automatic relays

baronsyntax: it's going to be more difficult for people to want to run relays once ISPs start charging for usage

baronsyntax: good luck man - I've got to hit the hay

me: they are going to charge per megabyte?

me: gnight
