Description

****This is to be installed on your own computers as to see your employees/students/children computer usage. This is for educational purposes.****

This listing will get you a program that gives you remote access to a computer that it is installed on. This tool is EXTREMELY useful when used in conjunction with my other listings such as the Password Stealer, Keylogger, or the Bitcoin background miner.

I will also include a guide on how to set up the entire process. Extremely detailed guide with pictures included. I will also personally help you to get this up and running at no extra cost!

Things you will be able to do:
View the users internet activity.
View the users screen.
View the webcam.
Execute programs remotely.
Take control of the mouse/keyboard.
Execute shell scripts.
Block websites from the user.
Many more features!
