### Do a lookup against a domains WHOIS information

Perform whois lookups for domain names (and IP addresses) with thousands of TLDs, top level domains, and SLDs, second level domains. Our whois lookup provides domain information such as registrar, domain status, expiration date, and name servers. It can also help you find contact information for the owner of a domain name or IP. Our domain name whois results also include IP and IP location information, web server information, related domain availability, premium domain listings, and more.
