

Thank you everyone for your comments and suggestions. One suggestion I especially like is the one about commission being affected by trade volume. To those of you that are either supportive of the change, or have faith in what I am doing regardless of whether you see the point or not, thank you for your support! I have done everything I can to earn that trust and I cherish it.

To those of you chalking my actions up to pure greed and ignoring the context for the changes, I say shame on you. When have I lied? When have I cheated or stolen from anyone here? When have I treated anyone unfairly? When have I lead you astray? Why do you turn on me now when I have poured my heart and soul into this community and project?

10% on \$50 orders? We are talking about an extra \$1.88! A \$10 order? An extra 38 cents! Do you think this site built itself? Do you think it runs itself? Do you have any clue what goes on behind the scenes to keep this going? Do you have any idea the risk the people operating this site are taking? Do you have any clue what we've been through to get here today? Do you have any clue what it's going to take to get through the next year?

Whether you like it or not, I am the captain of this ship. You are here voluntarily and if you don't like the rules of the game, or you don't trust your captain, you can get off the boat. For those that stay, we at Silk Road will continue to do everything in our power to keep this market running smoothly and safely, and thank you again for your support!

or serve up the stylesheet as a separate HTTP request, which maybe you don't want for some other reason.

This is very important in fact. We want to reduce every page request to a single http request whenever possible. The main bottleneck for hidden services is connections.

Are you telling me that i can't accept Ukash payments anymore from customers? You know how many are struggling with Bitcoins and prefer paying me through other paying methods?

that's right. you can sell them bitcoins for ukash and then they can buy your item with bitcoins.

I'm good with no more OOE stuff i just did that when ppl ask for it so i dont care, but just want to know how can ppl like BTC buddy and sugarmama stay open with the new OOE rule? i myself use BTC buddy to sell bitcoin to cash out what i feel is a lot safer and faster then using the other ways i can, so i dont want to see them gone they help a lot with ppl getting bitcoin fast and for vendor to cash out.

Another clarification. Bitcoin exchangers will still be able to operate. We are working to address the needs of the exchangers and prevent fraud on this front as well.
